ISBN-978-81-203-5084-7

The export rights of this book are vested solely with the publisher.

Eighth Printing (Third Edition) April, 2015

Published by Asoke K. Ghosh, PHI Learning Private Limited, Rimjhim House, 111, Patparganj Industrial Estate, Delhi-110092 and Printed by Mudrak, 30-A, Patparganj, Delhi-110091.

To
my wife, Madhabi, and
children, Sanghamitra and Aniruddha,
for unstinted encouragement and support

Contents

<i>Preface</i>	<i>xv</i>
<i>Preface to the Second Edition</i>	<i>xvii</i>
<i>Preface to the First Edition</i>	<i>xix</i>
<i>Acknowledgements</i>	<i>xxiii</i>
1. FACILITIES LOCATION AND LAYOUT	1-26
1.1 Introduction	1
1.2 Plant Location	1
1.3 Facility Location	1
1.3.1 Single Facility Layout Problem	3
1.4 Facilities Layout	5
1.4.1 Classification of Layouts	5
1.4.2 Modular Design Concept	6
1.4.3 Facilities Layout in Manufacturing	7
1.4.4 Layout Design Procedures	7
1.5 Computerized Relative Allocation of Facilities Technique (CRAFT)	12
1.5.1 Features of CRAFT	12
1.5.2 Major Disadvantages of Using CRAFT	13
1.6 Automated Layout Design Program (ALDEP)	15
1.7 Computerized Relationship Layout Planning (CORELAP)	19
<i>Summary</i>	23
<i>Unsolved Problems</i>	24
2. FORECASTING	27-73
2.1 Introduction	27
2.1.1 Basic Steps in a Forecasting Task	28
2.1.2 Categories of Forecasting Techniques	28
2.2 Simple Averaging Method	32
2.3 Moving Averages	34
2.4 Double Moving Average	34
2.5 Exponential Smoothing	38
2.5.1 Single Exponential Smoothing (SES)	38

2.6	Holt's Linear Method	41
2.7	Holt–Winter's Trend and Seasonality Method	43
2.8	Forecast Potentials Related to MAPE	45
2.9	Box–Jenkins Method	45
2.9.1	Time-Series	46
2.9.2	Sample Autocorrelation	47
2.9.3	Autoregressive Models (AR)	48
2.9.4	Moving Average (MA) Models	49
2.9.5	Back Shift Operator	50
2.9.6	Mixed AR and MA Models	50
2.9.7	Model Identification	50
2.9.8	ARIMA Model	54
2.9.9	Parameter Estimation	54
2.9.10	Diagnostic Checking	55
2.10	A Sample Situation	56
	<i>Unsolved Problems</i>	70

3. AGGREGATE PLANNING

74–99

3.1	Introduction	74
3.2	Linear Decision Rules (LDR)	75
3.2.1	The Alternatives for Responding to Fluctuation in Orders	75
3.2.2	Time Sequence of Decisions	76
3.2.3	Costs Involved in Planning Production and Employment	76
3.3	Graphical Approach	87
3.3.1	Preparation of Inventory Balance	87
3.4	Mathematical Programming Model	90
	<i>Unsolved Problems</i>	95

4. DISAGGREGATION

100–134

4.1	Introduction	100
4.2	Disaggregation	101
4.3	Master Production Schedule (MPS)	106
4.3.1	Role of Master Production Scheduling	107
4.3.2	Inputs to MPS	108
4.3.3	Outputs of MPS	111
4.3.4	An MPS Approach to Production Strategy	111
4.3.5	The Twelve Principles of Master Scheduling	115
4.3.6	MPS Terminology	116
4.3.7	Misconception about MPS	117
4.3.8	Master Schedule Performance Measures	117
4.4	Bill of Material	119
4.4.1	Bill of Material—Types	120

4.5 Material Requirements Planning 123
 4.5.1 Netting 123
 4.5.2 MRP Terminology 123
 4.5.3 MRP Outputs 129
 4.5.4 Nervousness in MRP 131
Unsolved Problems 132

5. CAPACITY MANAGEMENT 135–155

5.1 Introduction 135
 5.2 Capacity 135
 5.3 Measuring Capacity 136
 5.4 Determination of Available Capacity 136
 5.5 Load 137
 5.5.1 Planned Load 137
 5.5.2 Unplanned Load 138
 5.6 Capacity Expansion Strategy 138
 5.7 Capacity Management 139
 5.7.1 Capacity Control 140
 5.7.2 Capacity Planning 140
 5.8 Resource Requirement Planning (RRP) 141
 5.9 Rough-Cut Capacity Planning (RCCP) 141
 5.9.1 Benefits of RCCP 141
 5.9.2 Pitfalls of RCCP 142
 5.10 Capacity Requirement Planning (CRP) 142
 5.10.1 Inputs to CRP 143
 5.10.2 CRP Output 146
 5.11 Scheduling Strategies 147
 5.12 Infinite Versus Finite Loading 147
 5.13 Benefits of CRP 148
 5.14 Drawbacks of CRP 148
 5.15 Comparing the Strategies 148
Unsolved Problems 154

6. LOT SIZING RULES 156–172

6.1 Introduction 156
 6.1.1 Fixed Order Quantity (FOQ) 156
 6.1.2 Economic Order Quantity (EOQ) 157
 6.1.3 Lot-for-lot (LFL) 157
 6.1.4 Fixed Period Requirement (FPR) 157
 6.1.5 Periodic Order Quantity (POQ) 158
 6.1.6 Least Unit Cost (LUC) 158
 6.1.7 Least Total Cost (LTC) 159
 6.1.8 Part-Period Balancing (PPB) 159
 6.1.9 Wagner–Whitin Algorithm (W–W Algorithm) 162

- 6.2 Analysis of Different Lot Sizing Heuristic Methods 163
 - 6.2.1 The Different Methods—An Outline 163
 - 6.2.2 Analysis of EOQ 164
 - 6.2.3 Analysis of W–W Method 165
 - 6.2.4 The Groff (GR) Method 167
 - 6.2.5 Silver Meal (SM) Heuristic 169
 - 6.2.6 Freeland–Colley Method 170
 - 6.2.7 Analysis of the Entire Data Set 172

7. SCHEDULING DECISION RULES

173–219

- 7.1 Popularity of Scheduling 173
 - 7.1.1 Global Competition, Scheduling, and JIT 173
- 7.2 Broad Scheduling Approaches 174
- 7.3 Kinds of Decisions 175
- 7.4 Types of Manufacturing Scheduling 176
- 7.5 Single Machine Sequencing 177
- 7.6 Shop Floor Control 179
- 7.7 Input-Output Control 180
- 7.8 Infinite and Finite Loading 181
- 7.9 Forward and Backward Scheduling 181
- 7.10 Flow Shop 181
- 7.11 Techniques for Sequencing 182
 - 7.11.1 First Come, First Served 182
 - 7.11.2 Earliest Due Date 182
 - 7.11.3 Shortest Processing Time 182
 - 7.11.4 Last Arrived, First Processed 182
 - 7.11.5 Least Slack Time 182
- 7.12 Critical Ratio 182
- 7.13 Least Changeover Cost 183
- 7.14 Non-quantifiable Sequencing Rules 183
 - 7.14.1 Criteria for Comparing Sequencing Rules 183
 - 7.14.2 Performance Measure for the Shop 185
 - 7.14.3 Relation between Flow Time and Inventory 185
- 7.15 Two-machine Scheduling Problem 193
- 7.16 Three-machine Scheduling Problem 195
- 7.17 Job Shop Scheduling 196
 - 7.17.1 The n -Job/ m -Machine Flow Shop Problem 197
- 7.18 Job Shop 207
 - 7.18.1 Common Rule for the Job Shop Scheduling Problem 208
 - 7.18.2 Minimizing Make Span in Job Shop 208

- 7.19 Additional Techniques 211
 - 7.19.1 Line of Balance Technique 211
 - 7.19.2 Run Out Technique 211
- 7.20 Optimized Production Technology 212
- Unsolved Problems 215*

8. CASES AND EXAMPLES

220–319

- 8.1 Design of Continuous Flow Manufacturing System 220
 - 8.1.1 Introduction 220
 - 8.1.2 About the Manufacturer 221
 - 8.1.3 Manufacturing Overview 221
 - 8.1.4 Literature Review 222
 - 8.1.5 Principles of CFM 223
 - 8.1.6 Changes in the Organization's Mindset 223
 - 8.1.7 Techniques Used for CFM 224
 - 8.1.8 Facilities and Resources 224
 - 8.1.9 Materials Handling and Layout 226
 - 8.1.10 Production Planning 226
 - 8.1.11 Problem Analysis 226
 - 8.1.12 New System 228
 - 8.1.13 Proposed Production Planning 232
 - 8.1.14 Implementation 232
 - 8.1.15 Cost-Benefit Analysis 233
 - 8.1.16 Conclusions 234
- 8.2 Multi-Agent Manufacturing Planning and Control System 235
 - 8.2.1 Introduction 235
 - 8.2.2 Manufacturing Resources Planning (MRP II) 236
 - 8.2.3 Just-In-Time (JIT) 236
 - 8.2.4 MRP II and JIT—Comparison 238
 - 8.2.5 Multi-Agent Manufacturing have Planning Environment 239
 - 8.2.6 JIT Concepts with Kanban 239
 - 8.2.7 Implementing a Multi-Agent System 241
 - 8.2.8 Steps in Implementing Multi-Agent System 243
 - 8.2.9 Multi-Agent System as Used for a Two Wheeler Company 245
 - 8.2.10 Model Implementation 247
 - 8.2.11 Conclusions 247

- 8.3 Implementation of Kanban in a Process Plant 248
 - 8.3.1 Introduction 248
 - 8.3.2 Kanban Implementation Methodology at a Tyre Manufacturing Plant 249
 - 8.3.3 Productive Gain Sharing 261
 - 8.3.4 Conclusions 263
- 8.4 Design and Implementation of an Integrated Production Planning System for a Pharmaceutical Company in India 264
 - 8.4.1 Introduction 264
 - 8.4.2 The Pharmaceutical Industry in India 264
 - 8.4.3 SmithKline Beecham Pharmaceuticals (India) Limited (SBPI) 265
 - 8.4.4 Summary of the Environment 266
 - 8.4.5 Conceptual Framework for System Design 267
 - 8.4.6 Justification for an Integrated PPC System 268
 - 8.4.7 System Analysis and Design 271
 - 8.4.8 Appraisal of the Existing PPC System 274
 - 8.4.9 Design Philosophy of the Proposed System 274
 - 8.4.10 Capacity Assessment 275
- 8.5 Sinopsys Software Package 277
 - 8.5.1 Important Aspects of the Redesigned PPC System 278
 - 8.5.2 Immediate Objectives 280
 - 8.5.3 Scope for Further Work 280
 - 8.5.4 Lessons for Pharmaceutical Companies in Emerging Markets 281
 - 8.5.5 Conclusions 281
- 8.6 Design of Forecasting Models Using SAP APO for Tractor Industry and Its Measurement of Accuracy 282
 - 8.6.1 Introduction 282
 - 8.6.2 Objectives of the Study 282
 - 8.6.3 Assumptions Made 283
 - 8.6.4 Introduction to APO 283
 - 8.6.5 APO Requirements for Tractor Industry 285
 - 8.6.6 Common Benefits of APO 286
 - 8.6.7 General Terminology Used in APO 287
 - 8.6.8 APO Forecasting Capabilities 288
 - 8.6.9 Forecast Accuracy Metrics in APO 289
 - 8.6.10 Forecasting Models Used in this Study 290
 - 8.6.11 Forecasting Steps Using APO in this Study 292
 - 8.6.12 Types of Forecasting Done for the Tractor Industry 293
 - 8.6.13 Forecasting at Area Office Level 296
 - 8.6.14 Forecasting at Company Level 297

- 8.6.15 Forecasting at Indian Tractor Industry Level 298
- 8.6.16 Further Work to be Done 299
- 8.6.17 Conclusions 300
- 8.7 Multi-product, Multi-stage Lot Sizing 300
 - 8.7.1 Introduction 301
 - 8.7.2 Definition and Characterization of the Problem 302
 - 8.7.3 Formulation of the Model 305
 - 8.7.4 Model Validation 308
 - 8.7.5 Model Implementation 309
 - 8.7.6 Heuristic Model for Determination of Realistic Batch Size 309
 - 8.7.7 Solution with Heuristic Approach 315
 - 8.7.8 Discussion and Conclusion 317
- APPENDIX 1 SAMPLE CALCULATION FOR EBQ 317*
- APPENDIX 2 INDICATING FLOW CHARTS FOR SIMULATION RUN 317*

9. QUALITY 320-342

- 9.1 Definition 320
- 9.2 Quality Characteristics 320
- 9.3 The Three Aspects of Quality 322
- 9.4 Quality Assurance 323
- 9.5 Quality Circles 323
- 9.6 Benefits of Quality Control 323
- 9.7 Quality and Reliability 324
- 9.8 Total Quality System 324
- 9.9 Quality Improvement 324
- 9.10 Management of Quality 325
- 9.11 Statistical Process Control 325
- 9.12 Variation and Process Levels 326
 - 9.12.1 Introduction 326
 - 9.12.2 Sources of Variation 327
 - 9.12.3 Causes of Variation 328
 - 9.12.4 Tools for Identifying Process Variation Type 329
- 9.13 Statistical Process Control Charts 329
 - 9.13.1 How to Construct a Run Chart (For Dynamic Processes) 330
 - 9.13.2 How to Construct a Control Chart (For Dynamic Processes) 333
- APPENDIX 1 338*
- APPENDIX 2 341*

- 10. ERP WITH SAP R/3 343–358**
- 10.1 Introduction 343
 - 10.2 Production Planning (PP) Module of SAP R/3 344
 - 10.3 Master Data Needed for PP Module in SAP R/3 345
 - 10.3.1 Bills of Material (BOM) 345
 - 10.3.2 Work Center Data 345
 - 10.3.3 Routing Data 345
 - 10.3.4 Production Resources/Tools (PRT) 346
 - 10.4 Production Planning (PP) Module Components in SAP R/3 346
 - 10.4.1 Sales and Operations Planning (SOP) 346
 - 10.4.2 Distributed Requirement Planning 346
 - 10.4.3 Long-term Planning 347
 - 10.4.4 Demand Management 347
 - 10.4.5 Material Forecast 347
 - 10.4.6 Master Production Scheduling (MPS) 348
 - 10.5 Material Requirements Planning (MRP) 348
 - 10.6 Production Orders 349
 - 10.7 Capacity Planning in SAP R/3 350
 - 10.8 Production by Lot Size 351
 - 10.8.1 Sales and Operation Planning (S&OP) 352
 - 10.8.2 Demand Management 353
 - 10.8.3 Material Requirements Planning (MRP) 353
 - 10.8.4 Creation and Execution of Production Orders 354
 - 10.9 Repetitive Manufacturing 354
 - 10.9.1 Planning for Repetitive Manufacturing 355
 - 10.10 Production Planning for Process Industries (PP-PI) 355
 - 10.11 Resources 356
 - 10.12 Master Recipe 356
 - 10.13 Process Order 356
 - 10.14 Process Management 357
 - 10.15 Process Data Documentation 357
 - 10.16 Integration of the PP Module with the Other SAP R/3 Modules 357
- 11. LEAGILE MANUFACTURING—A CONTEMPORARY MANUFACTURING SYNDROME 359–382**
- 11.1 Introduction 359
 - 11.2 Benefits of Leagility in the Context of Production and Manufacturing Systems 362
 - 11.3 Necessary Information for Leagility in the Context of Production and Manufacturing Systems 363
 - 11.3.1 Tactical Information 364
 - 11.3.2 Strategic Information 364

11.4 Connecting Leagility to Production and Manufacturing Systems 365

11.5 Leagility Drivers 366

 11.5.1 The Essential Drivers of Leagility 368

11.6 Cells of Leagility 368

11.7 Leagility Interaction 369

11.8 Supply Chain Performance Measurement and Indices 371

11.9 Comparative Analysis of Leagility Index and Its Proposed Methodology 374

11.10 Theory of Constraint (TOC) and Leagility Conceptual Framing 376

 11.10.1 Achieving Leagility Through TOC 377

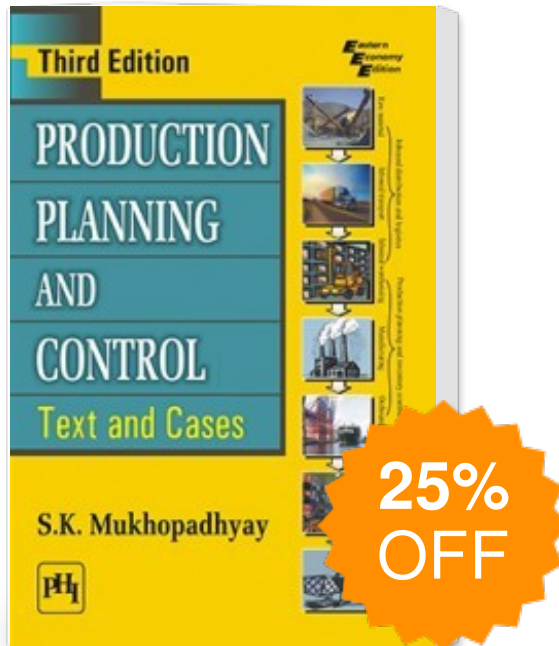

11.11 Benefits of Achieving Leagility through Theory of Constraint 382
