Ninth Printing (Second Edition) August, 2013

Published by Asoke K. Ghosh, PHI Learning Private Limited, Rimjhim House, 111, Patparganj Industrial Estate, Delhi-110092 and Printed by Raj Press, New Delhi-110012.

Dedication

This title is dedicated to the fond memory of the my only son ***G. Ganapathy Ram***, 17 years old, 180 cm tall, brilliant, weighing 60 kg who died on 30 July, 1986, due to medical negligence, wrong diagnosis, wrong operation, callous post operative treatment and lack of timely proper medical help. The integrated policy cases have been named after him.

I also dedicate this book to my son-in law ***Ranganath Narasimhan***, who passed away on 28 January, 2007 due to cancer. He persuaded me to update this book, constantly reminding me that my six decades experience should be passed on to the younger generation. He was one of the popular active person in Coimbatore region, associated with several NGOs, blood banks, humour club, Rotary club and several non profitable and religious forms. He was the founder Chairman of ADWISE Advertising—an accredited advertising company.

P. Gopalakrishnan

Contents

<i>Preface</i>	<i>xix</i>
<i>Preface to the First Edition</i>	<i>xxi</i>
<i>Acknowledgements</i>	<i>xxiii</i>

SECTION I CORE MAINTENANCE

1. Maintenance Management and Challenges 3–15

Relevance of Maintenance	3
Asset Management	4
The Role of Railways, Coal and Power	4
Failures and Maintenance	5
Maintenance: An Overview	5
Upgraded Technology	6
Good Maintenance Services	7
Problems of the Plant Manager	8
Situational Failures	9
Change in Environment	9
Factors Involved in Functioning of Maintenance	10
Design of Maintenance Systems: The Challenge	10
Automation and Maintenance	11
Factors Affecting Maintenance Efficiency	12
Maintenance Planning	13
Benefits of Maintenance Planning	14

2. Maintenance Objectives and Functions 16–23

Maintenance Objectives	16
Maintenance Costs	17
Down Time Costs	18

Responsibilities of Operators	19
Responsibilities of Maintenance Staff	20
Maintenance A–Z Functions	21

3. Maintenance Organisation 24–36

Maintenance Engineering	24
Organisational Prerequisites	25
<i>Esprit De Corps</i> —Team Spirit	26
Span of Control	27
Subordinates Development	27
Competence/Skills Utilisation	29
Hierarchical Levels	30
Conflict Management	30
Factors for Effectiveness of Maintenance	32
Objectives of Organisation Design	33
Types of Maintenance Organisation	34

4. Maintenance Systems..... 37–50

Classification of Maintenance Systems	37
Breakdown Maintenance	37
Routine Maintenance	38
Planned Maintenance	40
Preventive Maintenance	42
Reliability	43
Predictive Maintenance	45
Corrective Maintenance	45
Design Out Maintenance	46
Total Productive Maintenance	46
Japanese 5S	47
Contract Maintenance	48
Examples of Contract Maintenance	49
Cannibalisation	50

5. Design of Maintenance Systems..... 51–63

Influencing Factors on Systems	51
Criticality Determination	52
Downstream Effects	54
Age of Plant and Technology	56
Skill Availability	56
Bath Tub Curve	57
Maintenance Support Facilities	58
Operating Environment	58
Maintenance System Design Optimisation	61

6. Condition Monitoring	64–72
Need of Condition Monitoring	64
Plant Availability	65
Predicted Trend	67
Increased On-stream Plant Availability and Reliability	67
Plant and Personnel Safety	68
Optimal Maintenance Cost	68
Methods of Condition Monitoring	69
Choice of Equipment for Condition Monitoring	69
Vibration Monitoring System	70
Condition Based Maintenance	71
7. Non-destructive Testing (NDT)	73–81
NDT Concept	73
Non-destructive Testing Methodologies	74
Vibration Monitoring	76
Soap and Fibre Optics	76
Diagnostic Instruments A–Z	77
Lightning Fast Material Test	79
8. Total Planned Maintenance (TPM)	82–100
Planning System Components	82
Facility Register	84
Equipment Record Card	85
Maintenance Schedules	87
Principles of Scheduling	87
Scheduling Process	89
Work Specifications	89
Maintenance Records and Documentation	91
History Record Card	91
Defect Analysis and Down Time Records	92
Maintenance Work Order	94
Performance Report	94
Information Control Analysis	96
Control System for Planned Maintenance	98
9. Maintenance Turnaround	101–109
Outage Management	101
Turnaround	102
Turnaround Manager	103
Opportunity Maintenance	105
Network Analysis	105
Basic Steps in a Project	106

SECTION II RELATED AUXILIARY FUNCTIONS**10. Inspection and Lubrication 113–121**

Why Inspection?	113
Frequency of Inspection	114
Planning for Inspection	115
Inspection and Testing Facilities	116
Lubrication	117
Lubrication Programme and Planning	118
Tribology	121

11. Calibration and Quality 122–126

Standards of Calibration	122
Calibration System	123
Calibration Documentation	124
Maintenance Quality	125
Innovation Fountainhead	125
Building up of Quality	126

12. Maintenance Training and HR 127–137

Need for Maintenance Training	127
Planning Background	128
Training Levels	128
Training Methodology	131
Maintenance Incentives	133
Incentives in Maintenance	134
Incentive Administration	136

13. Safety and Maintenance 138–150

Significance of Safety	138
Potential Hazards	139
Safety Principles	140
Hot Work Safety Permit	142
Fault Tree Analysis	143
Safety Symbols	145
First Aid Kit	146
Safety Culture A–Z Issues	146
In the Wake of a Quake	147
Unsafe Metros	148
Safety Norms Switched Off	149
Elevated Risks	149
Food Safety	150

14. Computers and Maintenance	151–158
Computer System	151
Computer Application A–Z Areas	152
Maintenance Costs	154
Cost Benefit	155
Management Information System (MIS)	156
Maintenance Budget	157
15. Productivity and Industrial Engineering	159–170
Productivity Concepts	159
Work Study	160
Method Study	161
Recording Techniques	162
Ergonomics	164
Loads and Controls	168
Work Study and Ergonomics	169
Ergonomics and Maintenance	169
16. Activity Sampling for Work Measurement	171–180
Snap Reading	171
Normal Distribution	172
Random Timings	173
Areas under Normal Distribution	174
Applications of Activity Sampling	176
Advantages of Snap Reading	176
Disadvantages of Snap Reading	177
Work Measurement	177
Time Study	179
17. Energy Saving by Maintenance	181–193
Need for Energy Saving	181
Issues of Maintenance and Energy	182
Building Problems	183
Boiler and Steam Distribution	184
Boiler Maintenance	185
Air Compressor System	186
Heating Ventilation and Air Conditioning	187
Conservation Guidelines	188
Electrical System	189
Lighting System	190
Cyclic Replacement of Lamps	191
Economising on Light	192
Light Source Characteristics	193

18. Facilities Investment Decisions (FID) and Life Cycle Costing (LCC) 194–222

Asset Management	194
Decision Varieties and FID	194
Factors Influencing Facilities Investment Decisions (FID)	195
Selection/Replacement Problems	197
Economic Life Concept	197
Optimum Replacement Models	198
Time Value of Money	200
Capital Recovery Factor	201
Effect of Taxes and Depreciation	203
Cash Flow Illustration	203
Depreciation	204
Economic Analysis	206
Life Cycle Costing (LCC)	207
Aim of LCC	211
Application of LCC	212
Costing of Alternatives	214
A–Z of LCC	218

19. Evaluation of Maintenance Function 223–233

Need for Evaluation	223
A–Z Maintenance Challenges	224
Expectations: A–Z Parameters	225
Background of Maintenance	226
Equipment Discard Policy	226
MBO/SWOT and Managerial Styles	227
Evaluation Process of Plant Engineering	228
Evaluation A–Z Subjective Methods	229
A–Z Objective Criteria	230
Maintenance: Futuristic Scenario	232

SECTION III CORE SPARES ISSUES

20. Indian Spares Scenario 237–244

Capacity Utilisation	237
A–Z Financial Aspects of Spares	237
Spares Management A–Z Issues	240
Necessary Information	242
Initial Spares Provisioning	244

21. Spares Practices Survey.....	245–256
Research Methodology	245
Diagnostic Study	246
Organisational Aspects	246
Technology and Capital Equipment	247
Overhauling and Discard Policy	248
Obsolescence	249
Initial Provisioning	250
Categorisation and Codification	250
Standardisation	251
Lead Time Analysis	251
Requirement Planning	252
Selective Control and Stock Levels	252
Spares Bank	253
Import Substitution	254
Spares Information System	254
High Inventories: A–Z Causes	255
Research Survey Summary	256
22. Cost Reduction in Spares.....	257–265
Definition of Spare Parts	257
Spares A–Z Features	257
Categorisation of Spares	258
Financial Considerations	259
Choice of Equipments	259
Cost of Ordering	260
Inventory Charges	260
Cost of Stockout	261
A–Z Cost Reduction of Spares	261
Lead Time Reduction	262
Identification by Codification	263
Value Analysis	264
Variety Reduction by Standardisation	264
Spares Bank	265
23. Music-3D-Beyond Cost Criticality Method	266–273
Limitations of ABC Analysis	266
ABC Analysis	266
Vein-Ved Analysis	268
Spares Intelligence	268
MUSIC-3D Concept	269
Interpretation of MUSIC-3D	270
A–Z Advantages of MUSIC-3D	270

Other Selective Approaches	271
Service Level	272
24. Inventory Control of Spares.....	274–281
Objectives of Control	274
Stockout Cost	275
Ordering Charges	276
Service Level	277
Economic Order Quantity	278
Review Period	280
25. Maintenance Spares	282–287
Concept of Maintenance Spares	282
Poisson Pattern	283
Stock Levels	283
Service Level	284
Central Stocking	285
Illustration of Stock Levels	286
26. Simulation for Spares Control	288–293
Planning and Simulation	288
Simulation Method	288
Two-Bin System	289
Illustration of Simulation	289
Illustration on Initial Ordering	291
Use of Poisson Pattern	292
27. Insurance Spare Parts.....	294–299
Typical Insurance Parts	294
Stocking Policies	295
Financial Aspect	296
Spares Bank	297
Cost-Benefit Analysis of Stocks	298
28. Rotable Spares	300–307
Concept of Rotables	300
Financial Considerations	300
Queuing Approach	301
Application of Queuing Model	302
Solutions to Queuing Questions	302
Queueing and Rotables	303
Policy for Rotables	304
A–Z Issues in Queuing	306

29. Overhauling and PERT (Programme Evaluation and Review Technique) 308–315

Overhauling Spares Concept	308
Requirement of Overhauling Spares	308
PERT's Concept	310
Details of PERT	313
Procedure for PERT	313
Exercise on PERT	314

SECTION IV RELATED ISSUES ON SPARE PARTS

30. Reliability and Quality 319–326

Need for Reliability	319
Concept of Reliability	319
Failure Analysis	320
Failure Parameters	321
Mean Time between Failure (MTBF)	322
Mean Time to Repair (MTTR) and Log Normal Distribution	323
Bath-Tub Curve	324
Inspection of Spares	325
Inspection Methods	325
Inspection Infrastructure	326

31. Procurement of Spares 327–334

Buying Relevance	327
Right Quantity	327
Right Time	328
Right Price	329
Right Quality	330
Right Source	330
Import Substitution	331
Right Contracts: A–Z Aspects	332
Delivery/Transportation	333
Right Systems	334

32. Logistics and Warehousing 335–342

Storage Objectives	335
Physical Storage: A–Z Ways	336
Preservatives: A–Z Ways	336
Receipts Management	338
Documentation of Outputs	338
Valuation and Verification	339

Multiple Warehouses	340
Logistics Management	340
Business Logistics	341
33. Pricing and Marketing of Spares.....	343–353
Pricing	343
Pricing: A–Z Factors	344
Pricing Strategies	345
Market Skimming Strategies	346
Forecasting and Planning	347
Order Processing	349
Distribution of Spares	350
Spare Parts Sales: A–Z Problems	350
34. ASS (After Sales Service).....	354–362
Image of After Sales Service	354
Servicing Goals	355
Professionalising Customer Service	356
Organisation and Manuals	356
Cost of Servicing	358
Market Intelligence	358
Legal Aspects and Planning ASS	359
Spurious Spares and A–Z Problems	360
35. Multiechelon Distribution.....	363–371
Multiechelon Concepts	363
Multiechelon Characteristics	364
Classification of Multiechelon Problems	365
Inter-Echelon Interactions	365
Parameters in Multiechelons	366
Mathematical Approach	367
Mathematical Derivation	368
Optimum Stock Levels	370
36. Management of Obsolescence	372–379
Obsolete Spares Problems	372
SOS Items Concept	373
Obsolescence A–Z Issues	373
Solutions to Obsolescence	375
Movement Analysis	376
XYZ Analysis	377
Disposal of Obsolete Items	378

Maintenance And Spare Parts Management
